- Worked with direct RN/RPN supervision when preparing and administering medications.

PROJECTS

Personal Portfolio | *React*

April 2024 - Present

- Developed an interactive website using React to showcase my future projects.
- Managed and maintained project repositories on GitHub, ensuring code integrity and collaboration.
- [View my portfolio](#)

VitalSense | *JavaScript, React, HTML/CSS*

May 2024

- Collaborated with a team during a hackathon at the University of Guelph to create a heartbeat sensor that contacts an emergency contact when a medical emergency is detected.
- Responsible for developing the frontend using JavaScript and React with some HTML and CSS.
- Ensured seamless integration with backend systems using Express and Node.js for real-time updates.
- Project utilized Arduino and C++ for hardware interfacing (team's responsibility).
- [View the Devpost](#)

Nibble Noodle | *JavaScript, HTML, CSS*

April 2024

- Created a basic pixel snake game where the player eats apples to grow and loses if they hit themselves.
- Developed as the final hands-on assignment for JavaScript.
- Implemented game logic using JavaScript and styled the game with HTML and CSS.
- [Play the game](#)

Koda | *React, ChakraUI*

October 2023 - Present

- An ongoing project using React and MongoDB to create a productivity app.
- Collaborated with a UX/UI designer and brainstormed designs using Figma.
- Utilized Figma boards to effectively navigate meetings.
- Utilized GitHub to facilitate source code management and collaboration.
